

Christer J. Wahlund, President of HI TECH

Hail fellow HI TECH:ers and well met, Christer's the name and I'm the President of HI TECH, and head of the Epic Beard committee (Not really a committee, but I wish...).

In short my job is to make sure HI TECH as an organization functions, and to steer the ship safely through storms and towards new frontiers. As President I have the highest level of responsibility for HI TECH, this means I'm responsible for everything regarding the organization. I'm also the guy with the gavel at HI TECH's board meetings.

I'm your student representative in a bunch of different committees. What do I do there? I make sure that the interest of the members of HI TECH is always in consideration. 50% of my workload is also placed at the Student Union, where I have "Student Health" as my field of expertise.

What my job entails is hard to put in words, I like to see my main job as making sure HI TECH is in constant development. With me at the helm there will be no looking back. "Engineering, stand by for warp drive."
