**STUDENT ASSOCIATION
OF JÖNKÖPING SCHOOL
OF ENGINEERING**

"IT'S AN ASSOCIATION IN WHICH MORE THAN 150 PEOPLE ARE INVOLVED IN SOME FORM, SUCH AS VIA COMMITTEES, PROJECTS AND EVENTS."

Massivträ är framtiden

Vi behöver fler duktiga byggingenjörer som brinner för klimatsamarta byggmetoder!

För fem år sedan tog GBJ Bygg ett aktivt beslut att driva utvecklingen av byggnation med massiv trästomme. Till dags datum har vi genom massivträbyggandet bundit ca 15 000 ton koldioxid.

Vi behöver duktiga medarbetare som kan hjälpa oss driva utvecklingen av massivträ in i framtiden! Besök vår webbplats för mer information och kontaktuppgifter - Vi hörs!

HI TECH - BY STUDENTS FOR STUDENTS

HI TECH is the student association for all those who study at Jönköping School of Engineering. The association has been working to promote the interests of students for more than thirty years. This includes arranging joint activities, parties, pub nights and kick-off - many of the fun events that contribute to a more enjoyable social life for students. HI TECH also works to promote student influence and educational scrutiny

at, and in conjunction with, Jönköping School of Engineering.

HI TECH is a lot more than just board meetings. It's an association in which more than 150 people are involved in some form, such as via committees, projects and events. HI TECH is an association that is full of opportunities to improve the quality of student life at the School of Engineering, day by day.

WE CREATE OPPORTUNITIES FOR YOU!

One of our most important roles is to ensure you are provided with the best possible conditions in order to succeed - both during your time studying with us and in the future. We help to shape your working environment - for example, by ensuring the premises in which you study are pleasant to work in, that you can work in the best study climate, and that the courses

offered correspond to your expectations. We also work to help students to integrate with business, including by arranging Karriärum each year. This gives all students the chance to network, to make contacts for future careers, or to find internships or a company with which to conduct their degree project.

VILL DU VARA MED OCH BYGGA FRAMTIDENS SVERIGE?

Då ska du börja jobba hos oss på Flexator!

Studerar du till byggnadsingenjör, projektör, projektchef eller anbudskalkylator? Då ska du höra av dig till oss.

Flexator är en av marknadsledarna inom industriellt byggda verksamhetslokaler. Sedan 1956 har vi byggt tusentals hus som har format det svenska samhället. Vi tillverkar alltifrån förskolor, skolor och vårdhem till kontor och klubbhus. Och vi gör det så klimatsmart som möjligt - i trä. Var med och bygg framtidens hus tillsammans med oss på Flexator.

HI

HIKE

HIKE works with the social aspects of studying, including both small and large-scale events that are held throughout the year, ensuring that the time you spend studying is filled with fun activities. With HIKE, you can for example take a ski trip to Åre, or join them on a spring or autumn trip. Every year HIKE arrange the HI SLAGET, which is a kind of pentathlon where teams representing different faculties compete against each other. During the year HIKE also hold smaller-scale events, such as Fort Boyard.

HI EDUCATION

One important aspect of a student association's work is to assist with educational issues. HI EDUCATION acts as a mouthpiece for the students and works to increase the quality-assurance of the education provided. They work to develop educational programmes and ensure that all teachers maintain the high standards that the students demand. HI EDUCATION ensures that a course developer is appointed for each course, compiling course evaluations in order to gain awareness of what the students think about the courses they have studied. HI EDUCATION hold regular meetings with the School of Engineering and the Student Union, and maintain good contact with those responsible for the educational programmes.

MED ENERGI IN I FRAMTIDEN

Vi driver utvecklingen av innovativa energi- och kommunikationslösningar med ny teknik och hållbarhet i fokus. Tillsammans med våra kunder är vi en god kraft för ett gott samhälle. Är du lika laddad med kraft som vi? Bli en av oss och öppna dörren för framtidens energifrågor. Besök jonkopingenenergi.se för mer information.

HINT

Jönköping School of Engineering attracts students from all around the world. HINT works actively to help the international and the Swedish students to integrate, and to ensure that everybody is made to feel welcome. HINT arranges a variety of events, such as pub crawls and an event called "HINT ON THE RUN". They are also responsible to take care off exchange students at both the autumn and spring kick-off.

HI LIFE

HI LIFE is HI TECH's 'festmästeri', also known as the 'sexmästeri' here at JU. It is HI LIFE's job to bring the students at JTH together, ensuring they have as much fun as possible outside of their studies. They plan and arrange the autumn and spring kick-off events, and also organise other events during the year. HI LIFE is also involved in our student club, Akademien.
